Many libraries use the OverDrive eBook lending service to provide free eBooks and audio books to their users. The books can be read or listened to on many mobile devices, including iPads and iPhones.

OverDrive is great for finding fun and popular eBooks, but there are a few issues:

- Library eBooks cannot be read on Kindles
- Selection is limited
- Popular books are often already checked out so Users may need to wait to borrow them
- Mobile app for reading the eBooks is cumbersome to set up and use
- Reading features are limited (no highlighting or note taking)
- Users need an Adobe ID to download some kinds of eBooks (sign up for one here: <https://www.adobe.com/cfusion/membership/index.cfm>)

To use the OverDrive service, visit your local library website for login instructions and links to download OverDrive.

Users can search or browse for books on the OverDrive or library website. Once users have found an available book, they click “add to cart.” Click “proceed to check out” to download eBooks in the online cart. On iPhones and iPads, users can download eBooks directly from the browser app into the OverDrive reader.
