iOS 7 & You
Debbie Ginsberg, dginsberg@kentlaw.iit.edu
September 26, 2013

Which devices can be upgraded?
- **Phones**: iPhone 4, iPhone 4S, all iPhone 5 versions, iPod Touch (5th Gen).
- **iPads**: iPad 2, iPad (3rd & 4th Generation), iPad Mini.
- **Out of luck**: iPad 1, older iPhones and iPod Touch devices.

What’s new?
- **Better security**: Lock stolen devices remotely & permanently using “Find my iPhone”.
- **AirDrop** (iPhone 5s, the newest iPad, iPad Mini, and the newest iPod Touch only): Share files with nearby Macs.
- **Less spam**: Block spam texts and calls.
- **Control Center**: Swipe up to access commonly used controls.
- **Change text size**: Adjust text size in “Settings” >> “General”.

What’s changed?
- **New lock screen**: slide down to see today’s information without unlocking your device.
- **Better battery life**: the “multitasking” feature now uses less battery power (but other new features may counteract this).
- **Better multitasking**: See screenshots of the apps you have recently used. Hold a screenshot and slide up to remove a program from multitasking.
- **Smarter SIRI**: Ask SIRI to open camera or settings, or change preferences -- e.g. turn Bluetooth on or off. You can now change SIRI’s voice and correct the pronunciation.
- **Larger folders**: Folders can hold as many apps as you want.
- **Improved Safari**: Safari now uses a “unified” search box and moving between tabs is easier on iPhones.
- **App Store**: Apps can be set to upgrade automatically (in “Settings” app
- **Search apps & more**: Slide down to search apps & other data.
• **iTunes Radio**: Create your own personal radio station based on your favorite music.
• **Wifi or Cell?**: Restrict which apps use your cell minutes in “Settings.”
• **Calendar List**: See a list of your calendar events in the calendar “Search” feature.

**Privacy – More Options**
iOS 7 added “Privacy” features to “Settings”:
• **Location**: You can restrict how the location services track your movements.
• **Ads**: Limit ad tracking.
• **Apps**: Control the information apps can access.

**Should I upgrade?**

**You should wait to upgrade if you:**
• Rely on apps that are not yet compatible with iOS 7.
• Are happy with your current set up and don’t need any app upgrades; note that your access to new apps may be limited if they work only in iOS 7.
• Waiting for any major bugs to be fixed.

**You should upgrade if:**
• Any of the apps you use are no longer compatible with OS6.
• You need to organize your apps.
• You want the improved security features.
• The apps you use most often work in iOS7.

**How to upgrade:**
• Make sure you have the latest version of iTunes on the computer you use to back up your device.
• Back up your device first using the “Back Up” button on the version of iTunes you used to set up and/or sync.
• Connect your device to a power source.
• Go to “Settings” >> “General” >> “Software Update”
• Follow the instructions to upgrade.

You are unlikely to be able to revert to iOS 6, so upgrade with caution.
