The terminology used in the book is in many respects significant as showing the diverse position occupied by the authors. For instance, controversies in different jurisdictions are referred to as "foreign" elements rather than Contracts, Judgments, or Conveyances.

The book has its place in the literature of Conflict of Laws, and will no doubt prove helpful in many respects to students who desire to go beyond the ordinary boundaries of the subject as laid down in the courses commonly followed in law schools.

CASES AND MATERIALS ON THE CONFLICT OF LAWS. Ernest G. Lorenzen. St. Paul, Minnesota: West Publishing Company, 1937, Fourth Edition. Pp. xxxvi, 1138.

The new edition of Lorenzen's Cases on Conflict of Laws is in several respects an improvement on the third edition. There has been added a general historic survey of the entire subject as an introduction to the cases. The student in practice often feels the need of some help in the connection of the particular subject with other subjects of the common law and this general introduction supplies this need in a desirable way.

The section on Domicile which was omitted from the third edition has been restored and is somewhat enlarged. At the beginning of each chapter dealing with a different branch of the subject, there has been added a brief introductory note connecting up this particular field with the general subject of Conflict of Laws, and there is also frequent reference to the Restatement of Conflict of Laws. These features are highly desirable, and in short this is the best collection of cases for student use that has yet been published.
